There is a placeholder for the "Compare" CTA, while the user hasn't made at least 2 selections.

The high level of standard equipment meets your demands on style, comfort, safety and design.

The thrill of a spirited drive, characterised by style, responsiveness and control.

The highly sophisticated expression of Swedish luxury.

Comparable data are organised into tabs, with "Highlights" appearing first.

The user can remove a trim from his selection to make the comparison "lighter" (When there are 2 left and the user clicks to remove another one, he will be taken back to the trim selection stage, with a warning).

According to this concept there are 2 types of rows in the comparison matrix:

- One is a row where there is only one value for a property value and it is applicable to one or more columns. In this case the property label appears in the first occurrence's cell with a "Yes" or gap in the other cells.

- Another one is when there are more than one different values for a property. In this case all different values are printed in the cells.

Attribute	Yes	Yes
High-level interior illumination	Attribute	Yes

Attribute A	Attribute A	Attribute B
-------------	-------------	-------------
